## PASO HERALD

Established April, 1881. The El Paso Herald includes also, by absorption and succession, The Daily News, The Telegraph, The Telegram, The Tribune, The Graphic, The Sun, The Advertiser, The Independent, The Journal, The Republican, The Bulletin.

MEMBER ASSOCIATED PRESS AND AMER. NEWSP. PUBLISHERS' ASSOC. Entered at the Postoffice in El Paso, Tex., as Second Class Matter.

Dedicated to the service of the people, that no good cause shall lack a champion, and that svil shall not thrive unopposed.

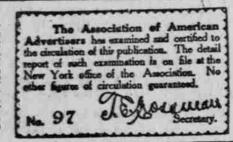

The Daily Herald is issued six days a week and the Weekly Herald is published every Thursday, at El Paso, Texas; and the Sunday Mail Edition is also sent to Weekly Subscribers.

TELEPHONES.

TERMS OF SUBSCRIPTION. Daily Herald, per month, 60c; per year, \$7.00. Weekly Herald, per year, \$2.00. The Daily Herald is delivered by carriers in El Paso, East El Paso, Fort Bliss and Towne, Texas, and Cludad Junrez, Mexico, at 60 cents a month. A subscriber desiring the address on his paper changed will please state in his communication both the old and the new address.

Subscribers failing to get The Herald promptly should call at the office or lephone No. 115 before 6:30 p. m. All complaints will receive prompt atten-COMPLAINTS.

CIRCULATION. The Herald bases advertising guarantee of ontracts on more than twice the circulation of ny other El Paso, Arisona, New Mexico or West Texas pa-per. Daily average exceeding 10,000.

HERALD TRAV-ELING AGENTS. Persons solicited to subscribe for The Herald should beware of impos-ters and should not pay money to anyone unless he can show that he is legally authorized by the El Pano Herald.

### Demand Proof Of Circulation

Newspaper advertisers should invariably make sure that they are getting what they pay for. That newspaper whose disculations easily proved false upon investigation, is the one that is always maintaining that "circulation figures are the private business of the publisher."

The Herald has nothing to conceal about its circulation because it does not

Circulation is the basis of all legitimate advertising selling. The business man who pays out his money for advertising space and does not satisfy himself absolutely of the circulation of the newspaper he is using, is cheating himself and wronging the honest publisher, because failure to get results from falsified circulation is apt to make the careless advertiser doubt the efficacy of advertising in general.

Make the publisher prove his circulation claims every time.

Texas will ship 2,000,000 turkeys to the eastern markets for Thanksgiving, but El Paso will bring hers in from Kansas in refrigerator cars. El Paso is growing tolerably well, but she will have to hurry to keep up with the rest of the state.

### Cotton Culture Worth Trying

TUMA took a long list of first prizes at the Arizona territorial fair. Yuma, by the way, is growing cotton of the finest varieties, that is becoming nationally famous. Cotton under irrigation is a profitable crop, even on a 10c market; the long staple varieties thrive well, and bring rich returns. It would seem as if this border country were exceptionally well situated to grow cotton economically, by reason of the unlimited supply of cheap labor to be derived from the very prolific Mexican population. Cotton culture affords employment for a large number of hands during a comparatively short season, and the women and children of the Mexican laboring class might perhaps be glad to add to the family earnings in this manner.

According to the World's Work, German cities are the best governed in the world. How far apart are the ideas of Germans and Americans on the subject of in a number of German papers:

"The place of mayor of Magdeburg is vacant. The salary is 21,000 marks (\$5,250) a year, including the rental of a dwelling in the city hall. Besides his salary the incumbent will receive 4000 marks (\$1000) for his official expenses. Candidates should apply before September 1."

### Where the Money Comes From

NE HUNDRED THOUSAND DOLLARS Mexican currency, or \$50,000 gold, was bid in Juarez for the fiesta gambling privilege lasting about 20 days in December. Six thousand dollars has already been paid for one month's keno concession. All the money that is paid for these gambling concessions in Juarez-practically every cent of it-will really be contributed by the merchants and wage earners of El Paso,

If the concessionaires can afford to pay \$2500 gold per day for the privilege of operating the gambling games, imagine what the gross receipts of the games must be during the fiestas.

It is probable that from 95 to 98 percent of all the money gambled in Juarez comes from this side of the river. Every dollar of this money is wasted by men and women who cannot afford to lose it, and is diverted from legitimate trade

The merchants and business men of El Paso must keep up a relentless and unremitting fight in self protection against the gambling evil; the surest plan of campaign has already been adopted-that of watching the frequenters of the games in Juarez and reporting their names to the associations of business men, so that credit may be withdrawn and employment terminated in the cases of individuals who thus prove themselves untrustworthy.

The drain of ready cash out of El Paso to gamble in Juarez has been felt during the entire year by almost every line of business in this city. A man connected with the keno games was quoted recently as declaring that the receipts of the games averaged \$10,000 gold per week-and nearly every dollar of it drained

El Paso cannot prevent the games from running, because they are in a foreign country; but the business men of this city can make it very unprofitable for El Paso patrons of the game in Juarez.

Through passenger service from Seattle to Galveston by way of the Hill roads will be started in the early spring, it is now announced. A palatial train, one of the best on the continent, will open up the new service. This route should become in time an important European carrier for both passengers and freight in either direction. It will be almost equal to a water level road from Galveston clear to the northern passes of the Rockies.

### Why Not Feed Here?

ATTLE for the eastern markets are largely finished on the farms of Indiana and Ohio. Steer calves, averaging 400 pounds, are sold at \$18 per head around Ousnah, Tex., and shipped to Indiana by the trainload. The farmers gather, and take from 10 to 30 head apiece for feeding.

The thrifty Indiana farmer invariably has large barns and his silos are filled with cattle feed. This Texas stock, which might just as well be finished for the market right in Texas, brings top prices in New York and Buffalo when sent in by the Indiana farmers.

Cattle feeding, and that only, offers the solution for beef shortage and high prices. The cattle business in the southwest still has possibilities of enormous profits if the cattlemen and farmers in this section will take a few lessons from the Hoosiers.

The normal movement of livestock from the Pecos valley is westerly through El Paso to Arizona and Pacific coast points. The only reason Pecos valley stock goes east is because the traffic arrangements between the Pecos valley and the west by way of El Paso are apparently with deliberate purpose made as great an obstacle as possible to the normal course of trade. A shortline railroad between El Paso and the Pecos valley would open up an interchange of immense importance

to all parties concerned.

### UNCLE WALT'S Denatured Poem

ARY had a little lamb, its fleece was white as wool, and sundry statesmen held her up, hard by the village school. "Your little lamb," the statesmen said, "you soon will have to shear, and then the woolen plutocrats will sew you up, my dear. They have the tariff doctored up in such a beastly way that little maids with wool to sell can get but

slittle pay. They rob consumers on the left, producers

on the right; and little girls with little lambs are in MARY'S LAMB a fearful plight. And when your lamb is nice and fat, and fit for butcher's stall, the meat trust reaches forth its claws, and takes it, bleat and all. The meat trust, backed by tariff laws

that are the nation's shame, is on the trail of little lambs, and you should dodge its game. Go home, go home, dear little maid, and take your lamb along, and tell your pa to seek the polls, and right a grievous wrong. If he will cast his vote for us, we'll guard your levely sheep, and never more in all the world shall little maidens weep." Then Mary leaped upon her lamb, and gave a mighty yell, and galloped to the booby batch, and took a padded cell,

## The Benefactor

**Daily Short Story** 

American millionaire, Charles M. E. Chugge, published the following advertisement in the New

in a coal mine for 10 years and at present must still be working there. present must still be working there, and visited from there the barren on a trip around the world at my expense. The trip, which is to be under-taken together with my secretary, goes from New York over Japan, India, through the Red sea to Europe, long stays on the Riviera, in Italy, France, Germany, Scandinavia, Russia, over the Crimea to Asia Minor, then to Egypt into Africa, along the coast to Capetown. Part of the time is to be devoted to Australia. trip is to last for three years, and one cear's stay is allowed in New York besides to make preparation, learn languages, etc. Coal miners, not less than 30 years of age are entitled to compete on the following conditions:

"I. The man must have been a miner for at least 10 years. 2. He must be intelligent, quick of perception and of a lively tempera-

"3. He must bind himself to work in

mine for 10 years more after his "References are unnecessary and use

less. The choice will be made by six men, selected not by me, but by the foremost editors of the country. "I have fixed a sum of \$150,000 to be spent on the trip, ensuring the greatest possible comfort.

"I will not see the man personally until after his trip. (Signed) "Charles M. E. Chugge."

It was all done without the suspicion of fraud. Among the 6000 petitions the committee selected 240 and the lucky one was picked by drawing lots. Fate smiled upon the miner Francis Root of New Orleans, his name being the first taken from the urn.

Root was a bachelor of 32, who look ed 40, however, for a man grows old quickly working in a coal mine.

The conditions were read to him by notary public, who asked him to sign

"One thing is very important," he said, "you must solemnly wind yourself to take up your work in the mine when you return and not give it up for 10 years. If you try to back out, you will be forced to carry out your part of the agreement if necessary by the aid of Pinkerton's men."

Francis Root signed the paper. For a year he lived in New learned French, German, Italian; learned to dress well and to move in the best society. He went to the thea ters, visited the opera, learned to sail, row and swim. He lived in a beautiful cottage on the Shore road, a young painter was his companion and taught him to appreciate the beauties of the the setting sun and the green woodlands. He often spent whole days n his little yacht alone with the painter's cousin, a charming young girl, who gave his education the last fin-

shing touches. On October 14, 1920, Francis Root went on board the great ocean flyer, life" Victori," accompanied by the young painter, who was to act as his secretary. On the promenade deck they were met by a messenger from Charles M. E. Chugge, who handed Root a let-ter of credit for \$25,000, aside from the amount of the stipulated traveling expenses; this money was to be spent for minor expenses in the great cities

from Tokio to Stockholm. Words cannot describe how Francis Root enjoyed the next three years. The wonder of Japan, the fairylike splendor of India, the smartness of the Rithe calm beauty of the nights painter, the loving letters from the cousin, the pleasures of Paris, the mountain scenery of the northern countries, a night in the desert under the yellow sky, then the long journey | Herald; also the serial-

N NEW YEAR'S day, 1918, the across Siberia's quiet tundras, the barbaric splendor of Kreml at Moscow, a summer night on the Lido at Venice, lying almost naked on the beach near the most beautiful women of Europe. In Rome he knelt before the masterof the people who must have worked in a coal mine for 10 years and at present must still be working there, the painter, had letters of introduction manufacture a steel pen from a strip to prominent people everywhere.

met the greatest poets and the most charming women in all countries. When he again landed in New York on October 14, 1923, the whole thing seemed to him a dream. He wanted to thank his benefacotr Charles M. E. Chugge, but his friend,

the painter, said: "No, you must wait; he will send for you. Four days later he was back in New Orleans. He returned to his old house and was shocked by its smallness and poverty, its mean, cheerless rooms, but he unpacked his trunks and filled hte rooms with all the treasures he had Persian carpets, Hungarian embroideries, Japanese woodcute, Chi nese silks, Russian samovars, Turkish

butterflies from Brazil, birds from India and hundreds of other On October 20 he received orders to go to work in his old mine two days a blow-nine fire and meits the gold of He remembered the agreement and thought of the Pinkertons who were to force him, and obeyed the order. On October 22 he was deep under ground working half naked in the black pit, the perspiration covering his thole body, all alone, his miner's lamp faintly illuminating the darkness, And here he must work 11 hours every day. The third day they sent for him. him in the directors' room.

Charles M. E. Chugge was waiting for want to change his clothes. No! So much the better, Mr. Chugge would rather see him in his working clothes. Only a small souvenir Francis Root would like to fetch from his house. It would take only a moment.

In the director's room, Francis Root saw his benefactor, Chugge for the first time. He was an indolent, pale, fat man, lying in a big easy chair. His face looked sleepy. He raised his fat hand almost imperceptibly as a greeting. "Sit down, Mr. Root, and tell me how

you feel.' Thank you, I prefer to stand. Do

you wish a detailed report"

The fat face smiled. "No, no! only want you to tell me how you feel now." On his way home Francis Root El Pago a temple of the Mystic Shrine began to suspect that the millionaire did not care to hear about his trip, and for that reason he had slipped a resure he asked once more:

"Shall I tell you about India, about the starlit hights of the north, of our and Silver City, are now running betiger hunts in Bengalan

The stolld fat face smiled more wickedly than before and pointing a fat finger at him the millionaire an-"No, sir, none of that! want to hear how you feel when you is on are below in the dark pit, where you along. are to spend the next 10 years of your

It was quiet in the room. Francis Root's hand sought his pocket in which he had the souvenir, so Alf Hampton says. whipped out a revolver and shot his benefactor down with three shots. One two lodged in his fat abdomen.

When he told the jury about his trip around the world and his talk with his benefactor he was acquitted on the

during the Civil war. After many years of using the mod-ern pen, the supreme court has gravitated back to the old-fashioned quill. The quill pen in the supreme court was like the snuff box in the senate, too fine a tradition to be dispensed with, vet not available for everyday use. Last year attorney general Wickersham appeared in court one day, and found when he went to sign a paper that his fountain pen was missing from his vest pocket. So he took up the old quill are made. These blanks are next and dashed off his name in a manner worthy of the best Greek traditions. In the old days the quill pen was worn down in the course of eight hours, and in the larger offices an usher was employed to go from desk to desk with his pen-knife, mending and sharpening the quills. The word pen-knife originated from this practice.

the lense box of George Washington.

This was used by Abraham Lincoln

The American Lead Pencil.

The United States is now making the bulk of its own pencils. The industry started in England in 1565, when the Cumberland graphite mine was discovered. So pure was this graphite that Abe Martin

If a feller screwed up his face when he asks fer credit like he does when he's asked t' settle he wouldn't get it. Nobuddy but a lawyer ever waits fer both sides of a story.

it could be used in pencils without any change other than to glue it between strips of wood. A century or more later the industry got its best footing in Germany, which to this day leads the world in the production of pencils. About a half century ago American manufacturers took up the business, and today they are among the world's heaviest producers. The leads of pen-cils are made of graphite and clay. The average person is familiar with graphite in the form of stove blacking and bicycle lubricants. The present supply of this product, which is really the diamond in another form, comes from Mexico, eastern Siberia, Bohemia and Ceylon. The more clay used in combination with the graphite, the harder will be the lead.

In the manufacture of the lead pencil the graphite is first treated by a numof processes, then mixed with the (Consinued on Next Page.)

PROBABLY the only way to solve! slot to the point. Great accuracy is required in this operation, as it is ab-solutely necessary that the slit should e in the exact middle of the point. piness in matrimony a dead sure thing, instead of the hundred-to-one and the pens are passed to expert girls who place them on a white stone to see shot that it is now, is to bring the that they are of the exact proportions question of marriage down out of the that they are of the exact proportions clouds and put it on a practical basis.

In reality, marriage is, primarily, a business proposition that involves issues of the most material sort. When a man marries he goes into a partnership that he swears he never will break, no matter whether it turns out well or ill. He assumes obligations that he oan never honorably repudiate. He takes upon himself the burden of supporting an indefinite number of peo-

ed out must possess identically the same qualities as these standards. It When a woman marries, she settles her fate so far as this world's goods cuts herself off equally from what she might earn herself if she had stayed asked a girl to marry him, he reflected and chattels are concerned, because she of metal. The principal factories of the single, and from marrying some other man who might provide for her better than the one she has chosen.

Marriage means all of this financially to both men and women, and yet we ignore this business side of it, and persist in regarding it from the sentimental standpoint.

If a callow young couple think they are in love they rush into matrimony The gold bars are first rolled into even though they haven't a penny to bless themselves with, and people who are sane enough on other subjects applaud them and pat them on think of the hely estate as one in the back for doing it instead of having them committed to the nearest bottle, places it on a fine brush which lunatic asylum.

Stomach Best Heart. Of course, such a marriage almost invariably turns out a failure, because, as we are unfortunately constituted. we are more stomach than heart and only in poetry and novels can one feed

In real life, the possession of the most intense devotion to another does operation is a very delicate one, since not prevent us from getting cold and the slightest excess of exposure to the hungry, and desiring to keep up with heat would ruin the whole pen. The the fashions.

It is an established fact that nobody can take the proper interest in lovemaking when his or her appetite is clamoring for beefsteak and onlons, nor can any remance survive the hounding of the bill collector. For any marriage to be happy, it must have sufficient financial backing at least to provide the necessities and a few of the frills of existence.

In view of this, it is nothing short of a crime that we should teach young people that love is enough to on. It isn't enough by a long shot. Love without money enough to live de-cently on is a shorter cut to the di-vorce court than marriage with money

Undoubtedly the chances of matrimonial happiness would be enormously increased if the wolf did not howl outupon whether a salary that barely supported him would support a wife and twins, and if the girl considered question of whether she was making good trade in giving up her \$75 job for a \$40 husband, and exchanging three square meals a day for a diet of bread and water, with a certainty of getting

only the water. Marry Realtiles.

The trouble is that we have thrown a glamour about matrimony that makes young people who have never tried it which people are illied above the or-dinary needs of life, and when they find that this isn't true, and that after marriage they are just as hungry, and just as much interested in pleasures and amusements as they were before, why, it is apt to give those who have rushed in unprepared a jolt from which

If marriage were always painted as a stern reality, a cold, hard, business proposition, requiring both capital and inbor, to be carried on successfully, we should have fewer weddings, but they would be happier ones.

mocking us. Mere Man-Are we going to play cards, or are we not? First W. B. (ignoring the M. M.)-Next time I see her I'm going to tell

Second W. B .- And I'll back you up, Third W. B .- I wish she'd come in

now. I'd give her a piece of my mind. (Owner of phonograph suddenly ap-Mere Man (to himself)-Now for

some fireworks.

Phonograph Owner-Good evening. How did you like the concert? First W. B. (smiling sweetly)-Very much, indeed, but why didn't you play some of those operatic airs? I just love them.

Second W. B .- So do I. Third W. B -Yes, we missed them P. O .- Oh, I'm so sorry. I'll go back and start one up. Shall I? Chorus of Women Boarders-Oh. please do.

Mere Man (throwing his cards on the table in disgust)-Well, for the love of Second W. B .- Mercy, I did .- Can I Mike! Ladies, GOOD-NIGHT! (Rushes

upstairs.) (Curtain,)
